Dear Hiring Manager,

I am Pleased to introduce myself; this is srilalitha, graduate student at san Jose state university currently pursuing master's in software engineering majors in Data science. I am a perpetual learner and that enthusiasm in me drive to continue studying my Master's post work experience. I am very happy to apply this position since it matches my skills and interests. I Am Confident in my ability to perform at this position applied with my skills in Machine learning, python, people and time management.

Formerly I worked as Data scientist at Qolsys Software systems, who is an active team member in 10. I had an extensive range of responsibilities including selecting features, data analysis & mining. Expanding companies' data by exploration and visualization techniques. Improving data collection techniques, processing data, and doing ad-hoc analyses. As a Data Scientist, I was required to have excellent communication skills, understanding of algorithms, knowledge of SQL, and excellence in applied mathematics. During my two-year tenure at Qolsys, I applied these skills daily and performed exceptionally at the company.

I believe my personality has also played a major role in my ability to succeed in this career. I am an extremely analytical, data-oriented, and calculated. Even in my personal life I like to look at the data before deciding. I like to analyze outcomes.

Yours truly,
Srilalitha Veerubhotla
